## PHASE-1 PREPARING THE DATA TO FEED

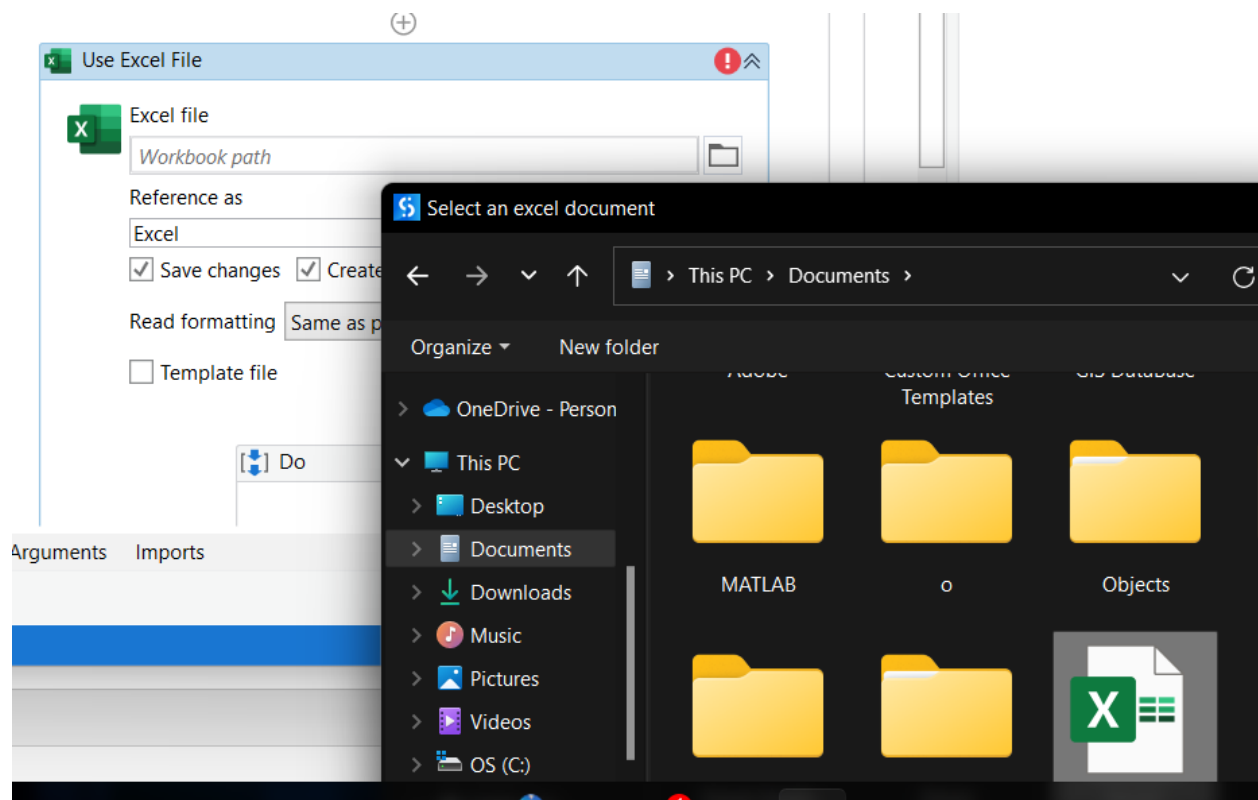

### Step-1

Dropping single excel scope activity

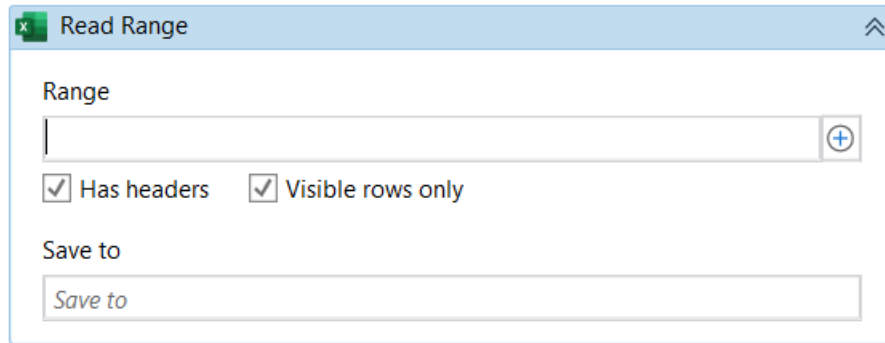

### Step-2

Adding excel to the project

### Step-3

Dropping the read range activity in the single scope activity

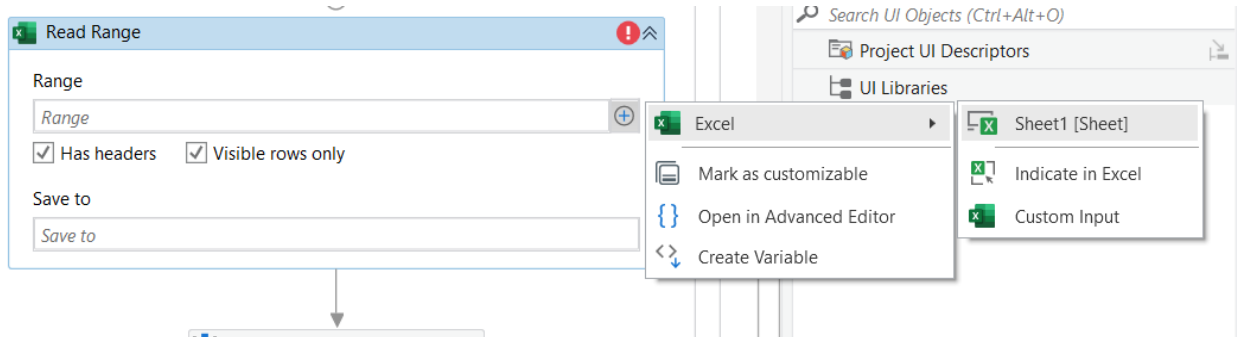

Step-4

Creating a data table type variable

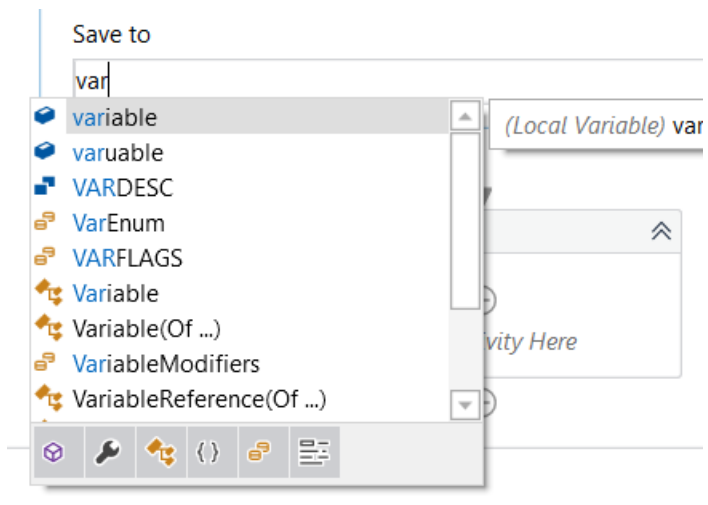

Step-5

Placing the Excel with a sheet in the read range box

Step-6

Placing the Datatype variable in save to field

Step-7

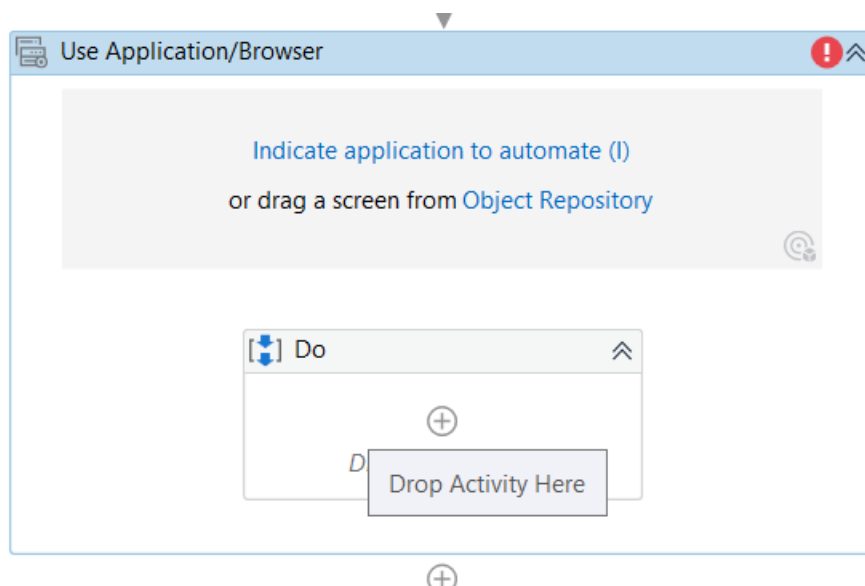

Follow the read range activity by write line activity by mentioning text as EXCEL

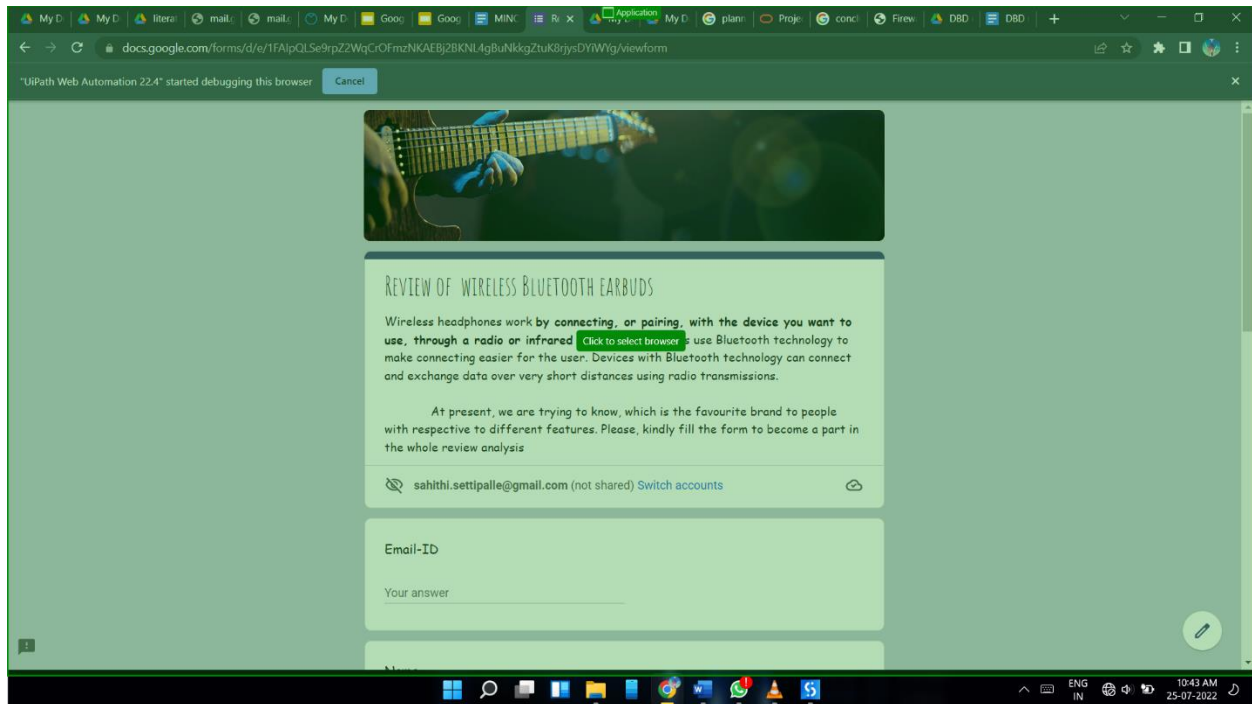

## PHASE-2 OPENING THE BROWSER BY AUTOMATION

Step-8

Use the use browser activity, by following the write line activity

Click on the box, above Browser URL, which helps you to select the tab in chrome to get the url

## Step-9

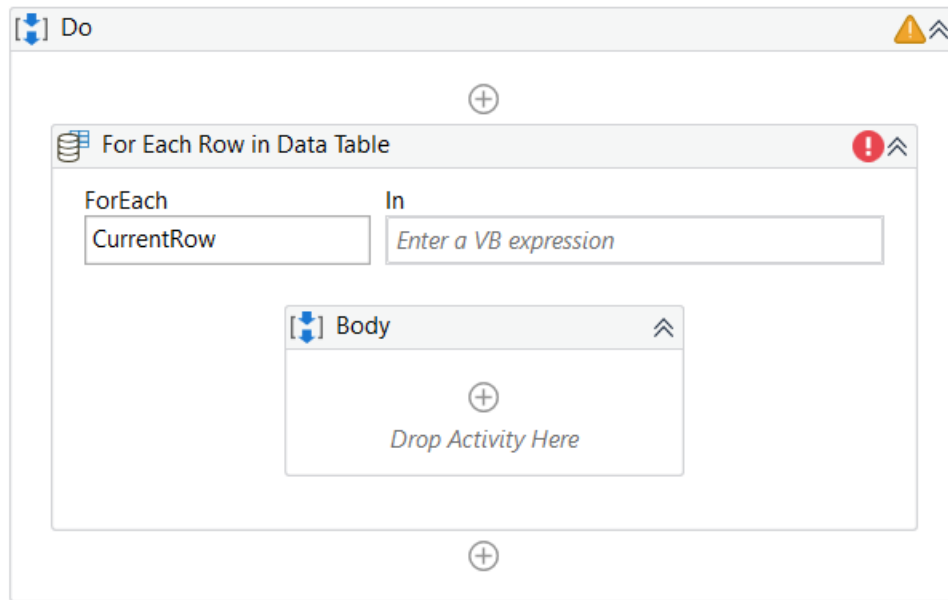

Write the action in do an activity, which needs to be automated

## PHASE-3 FILLING THE FORM BY AUTOMATION

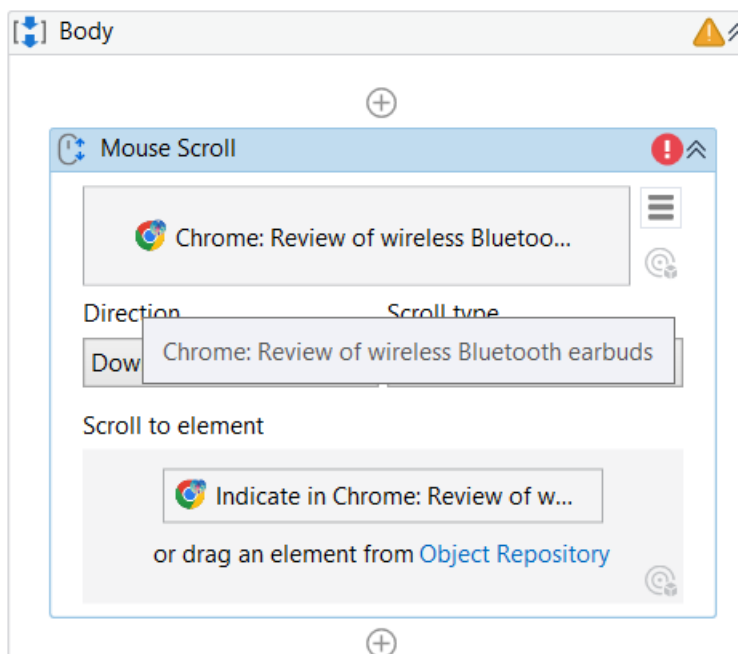

### Step-10

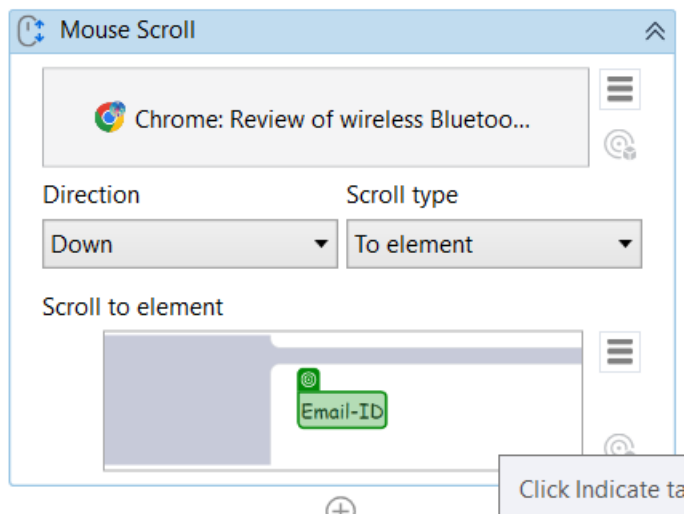

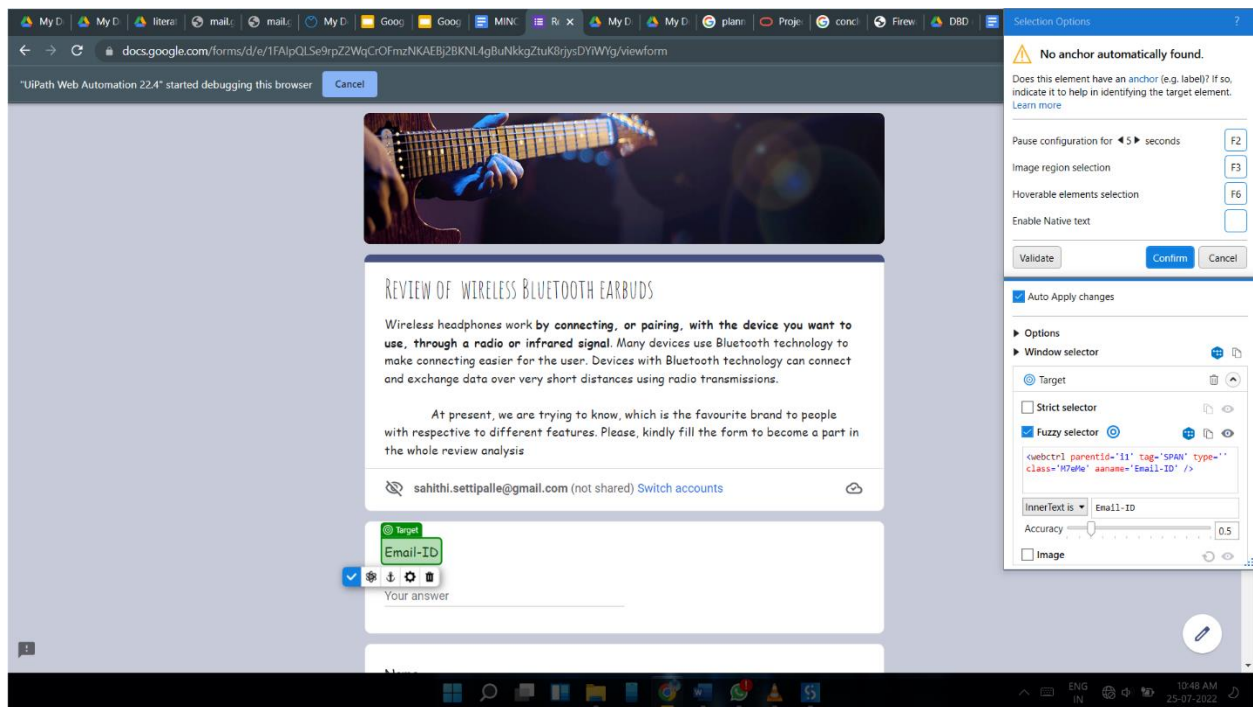

Use For each activity, to fill the form multiple times. We need to assign a table. We will be assigning variable which is a data table type

## Step-11

Use the mouse scroll activity, & choose the scroll element in the web page as target to go there

## Step-12

Use the type into activity, to type answers for every question. Click indicate target on the screen to indicate the UI element as a target

Type a command `CurrentRow("//column name").ToString` in this field such that, the current row running, the respective column cell value is give as answer to the selected UI element

Type Into

 Indicate in Chrome: Review of w...

or drag an element from [Object Repository](#)

### REVIEW OF WIRELESS BLUETOOTH EARBUDS

Wireless headphones work by **connecting, or pairing, with the device you want to use, through a radio or infrared signal.** Many devices use Bluetooth technology to make connecting easier for the user. Devices with Bluetooth technology can connect and exchange data over very short distances using radio transmissions.

At present, we are trying to know, which is the favourite brand to people with respective to different features. Please, kindly fill the form to become a part in the whole review analysis
